Finn Rosenkilde Rasmussen

Software developer / PHP, Java, Angular, Bootstrap
Copenhagen Area, Capital Region, Denmark

Summary

I am a hard core senior developer with more than 35 years of experience where at last 6 years have been with netbank systems at SDC.

I am a senior java / web developer, with speciality in frontend technologies like HTML5, CSS3, JQuery Mobile, JSon, XML, JavaScript, REST and is fluent in languages like Java, PHP. I have also been teaching C# and .NET. I also work with the backend software as a natural part of the development of interfaces to other systems or databases.

I like to make solid and stable software solutions, where the end user have high priotity and also keping in mind that the software have to be maintained by other people in the organization.

My code is clean and production ready, when I check it into the software control system and usually I have added some JUnit tests together with code review.

I like to work in Scrum / Agile environment like JIRA fra atlassian.

I am very god to explain technical details in a way, so non technical persons will have an understanding of how it works.

Technology:
J2EE, Java 1.7, JSP, XML, HTML5, CSS3, JQuery, JSon, Ajax, REST, JavaScript, C#, .NET, ASP, PHP, C/C++, SOAP, Web services, WSDL, bootstrap

Platforms:
Apache, Tomcat, Web sphere, Bea weblogic, Axis, XAMPP, LAMP

IDE:
Eclipse, Visuel studio, IntelliJ

DB:

mySQL, DB2, Oracle, mssql, Toad, T-SQL, stored procedures

Build/deploy:

CVS, VS, GitHub, Maven2+3, Harvest, Dimension, Subversion
(SVN), Jenkins, TortoiseHg

CMS:

CMD, Typo3, Drupal, Wordpress, Joomla

Other:

SCRUM / Agile JIRA from atlassian

Speciality:

JUnit, JDBC, Log4J, XML, JQuery Mobile, Taglib, JSTL, Netbank,
Responsive design, soapUI, DIBS, SSL, API e-conomic, Google
Calendar API, JAXB,

Experience

HvepseEksperten.dk ApS
Senior Software Developer
March 2018 - Present
Hillerød, Hovedstaden, Danmark

Topdanmark
PHP developer / Typo3
February 2015 - February 2018 (3 years 1 month)
Ballerup

Task:

Convert the old implementation of 'liv' pages into a more modern typo3
concept

Role:

PHP / Typo3 developer

Result:

Used skills:

PHP 5.6, git, Jenkins, log4php, soapUI, maven, phpstorm

Flexya.dk
Java Developer
January 2015 - January 2015 (1 month)
Lyngby

Task:

The task was to

1) Hent rest gæld i ejendom fra e-nettet.dk, salgsopstiling

Role:

My role was developer task

Result:

The XML result was fetched from e-nettet.dk

Used skills:

maven, github, hibernate, spring, mysql, innodb, jstl, tiles, log4j, velocity, jsp, servlet, e-nettet.dk, xml, soapUI,EhCache,boneCP

DR - Danmarks Radio
.NET C# / PHP Developer
November 2014 - December 2014 (2 months)
Amager

Task:

The task was to:

1) Investigate, if it was possible to add responsive design to some old existing pages
2) Investigate, how existing .NET / C# applications could be re-used in a Drupal cms system
3) Secure 2 existing PHP applications against hacker attacks by update of the PHP code

Role:

My role was developer task

Result:

The PHP applications are already in production

Used skills:

PHP, PhpStorm, HTML5, CSS3, JQuery, javascript, responsive design, bootstrap, Github, .NET, C#, Drupal, jira

CapaSystems A/S
Java Developer
April 2013 - November 2014 (1 year 8 months)
Tåstrup

Task:

The task was to:

1) Add new functionality to the existing Performance Guard product

2) Fix bugs found in the product

3) Add JUnit test

Role:

My role was to improve the product with new features and to fix existings bugs

Result:

The next release of the product is ready for download in nov/dec

Used skills:

MSSQL / T-SQL, REST, Stored procedures, Tomcat, JSP, Java 1.7, JDBC, SVN, JQuery, HTML5, CSS3, bootstrap, JUnit test, Jira from atlassian, IntelliJ, TortoiseHg, Jetty

Nordea
Java developer
March 2013 - March 2013 (1 month)
Tåstrup

Task:

The task was to:

1) Add new functionality in two existing applications

2) To implement the jenkins annotations @Getter/@Setter/@Slf4j instead of get/set methods, Log4J

3) Fixed errors and warnings found in eclipse

Role:

My role was to implement the Taks, within the specified fixed timeframe

Result:

The source code have been reviewed and tested in the acceptance environment

Used skills:

Oracle 9.7, Stored procedures, SQL, Toad, Jenkins, Tomcat, Bea Weblogic, JSP, Java 1.7, JDBC, Annotations lombok project, Eclipse, JSTL, Maven 3, Subversion

HvepseEksperten.dk ApS
Java / PHP / HTML5 Web developer
July 2012 - February 2013 (8 months)
Hillerød

Task:

The task was to implement the following:

1) Update existing homepages, so they can be shown on any smart devices, like iPad, iPhone and use responsive design with the JQuery mobile technology.

2) Implement of a payment flow using the DIBS interface, where the user may add some items to a basket and type the customer information and finally pay online with the credit card using the DIBS payment gateway.

Role:

My role in the project was to implement the newest HTML5 / CSS3 / Jquery Mobile functionality in a common CMS template.
Code the web services in Java / PHP, which handles the data to the basket and the customer form.

Result:

See the result of the implementation on a smart device here:
- http://rosenkilde.me/
- http://maimann-coaching.dk/

See the result of the online payment implementation here:
I have a great sense of humor, so you may add 'Finn' to the basket and pay online with your credit card here:

- http://finn-rasmussen.com/lej-en-konsulent/

Used skills:
J2EE, Java, JAXB, SOAP, Web Services, soapUI, JUnit, SQL, PHP, CMS, HTML5, CSS3, Ajax, JQuery, JSon, JQuery Mobile, JavaScript, SEO, DIBS, HTTP, HTTPS

SDC
J2EE / Java developer
January 2012 - June 2012 (6 months)
Ballerup

Task:
The task was to implement the following:
Integration of common accountlist, transfer of money between foreign account and local account and update the account settings. The netbank users must see one and not two different bank accounts, even if there are remote account data from a foreign bank with saldi in the account list. The web part was developed with the 'Stripes' framework and the interface to the foreign bank was through several web service calls on a secure line. The functionality was incorporated in the existing netbank software, and one of the goals was, that existing netbank users must not see any change for all the different banks in Denmark, Norway and Faroe Island.

Role:
My role in the project was to implement the new functionality in the existing netbank components and make sure that existing netbank users didn't se any change in the netbank components, even if the web software was released to production before the backend was ready, which actually was the case.

Result:
The project went in full production in july 2012, and the customer was very satisfied with the result.

Used skills:
J2EE, Java 1.6, JSP, Servlet, JAXB, SOAP, Web Services, soapUI, JUnit, SQL, CMD, HTML5, CSS3, Ajax, JQuery, JSon, JavaScript, HTTP, HTTPS, Maven2, Harvest, Eclipse, Stripes

Maimann-coaching.dk
Udvikler

2012 - 2012 (1 year)

install drupal 7, with the required modules and themes and added the content

SDC
Java / HTML 5 / JQuery / Ajax developer
September 2011 - December 2011 (4 months)
Ballerup

Task:

The task was to implement the following:

Expand the credit case for bank employee with several new features, and add the 'group' term in the selection of participants in a credit case

Role:

My role in the project was to implement some of the new functionality in the existing medarbejder portal

Result:

The project went in full production in december 2011, and the customer are using the functionality right now.

Used skills:

J2EE, Java 1.6, JSP, Servlet, JAXB, SOAP, Web Services, soapUI, JUnit, SQL, CMD, HTML5, CSS3, Ajax, JQuery, JSon, JavaScript, HTTP, HTTPS, Maven2, Harvest, Eclipse, Stripes

Topdanmark
Typo3 / PHP / WS web developer
March 2010 - July 2011 (1 year 5 months)
Ballerup

Task:

The task was to implement the following:

To convert the existing online portal for private customers for all 3 brands from being based on Java and texts strings to PHP and webservices. Introduction of SSO (NemID) and addition of functionality for Life and Pension customers, making them able regulate Unik Link and Profil pensions and furthermore SSO to Danske Bank online banking.

Role:

My role in the project was to implement some of the new functionality in PHP, like show and update the pension info and some of the insurance policies.

Result:

The online portal for private customers went in full production in june 2011, and the customer are using the functionality right now.

Used skills:

PHP, Typo3, SOAP, Web Services, soapUI, JUnit, HTML5, CSS3, Ajax, JQuery, JSon, JavaScript, HTTP, HTTPS, Eclipse, Dimension, nemID, SSL, OOA, OOD, WSDL

HvepseEksperten.dk ApS
PHP developer
October 2009 - February 2010 (5 months)
Hillerød

Task:

The task was to implement a taglib, so it was easy to integrate into existing templates at CMS systems like Wordpress, Typo3, Joomla etc.
As an example: Add a basket and a customer form with just a few lines of PHP code

Role:

My role in the project was to specify, develop, test the component

Result:

Several PHP components was released, like:
- bootstrap loader
- DB, basket, customer interface
- MVC, dao / list / form / controller / view components
- Layout / Menu / Tab components
- BASE / BASIC / UTIL / FORM standard html components

Used skills:

PHP, HTML5, CSS3, JavaScript, Ajax, JSon, JQuery, Eclipse, mySQL, HTTP, HTTPS, FTP, Wordpress, Joomla, Typo3, XML, DIBS, responsive designs

SDC
J2EE, Java web developer
August 2005 - September 2009 (4 years 2 months)
Ballerup

Task:

The task was to implement the following:
Development of new functionality for more than 160 different netbanks in Denmark, Norway and the Faroe islands

Role:
My role in the project was to implement the following:
==
- Netbank, accountlist, account transfer beteen SDC netbank saxoprivatbank via Webservices
- Netbank, basket / receipt, multiple updates
- Netbank, BiFrost, merge 3 different versions of netbank to one common nordic version (the one which is in production to day)
- Netbank, business functionality, basket- and receipt across of aggrements with different prokura demands
- Netbank, Bookmark of pages
- Netbank, New template for Norway
- Netbank, show account holder
- Netbank, target user information, depending of agreement and roles
- Netbank, many improvements, around in the netbank
- Medarbejderportal, credit case, select participants in a credit case
- Medarbejderportal, COP (Card Online Portal)
- Medarbejderportal, XPortalen
- Medarbejderportal, FPPS+

Result:
The differerent work packages are all in full production

Used skills:
J2EE, Java, JSP, Servlet, XML, CMD, JUnit, HTML, CSS2, JavaScript, HTTP, HTTPS, Eclipse, Maven2, Harvest, SSL, Bea weblogic, MQ queue, Quality center, service desk, TIA, COP, JSR 168/ JSR 286, gateway

TDC
Java developer
October 2003 - July 2005 (1 year 10 months)
København S

Task:
The task was to implement the following:
Implement the next generation of eButik (TotalShop), where the user may add a phone to the basket and pay online with creditcard

Role:

My role in the project was to implement the following:

The payment flow utilizing the DIBS gateway

Result:

You can see it in production to day

Used skills:

J2EE, Java, JSP, Servlet, XML, HTML, CSS2, JavaScript, HTTP, HTTPS, Eclipse, SSL, Intershop, Enfinity, DIBS

Cap Gemini
Java / Web developer
1999 - June 2003 (4 years 6 months)
Gentofte

Task:

The task was to implement large portal projects

Role:

My role in the project was to participate as a developer in large portal projects

Result:

Large portals as ....

- DR.dk, Windows Multimedia player, see televison on the net, video on demand
- Rute planning for Post Denmark
- Copenhagen Community electronic citizen service
- Denmark tourist portal www.visitdenmark.com
- Ledernes hoved organisation hjemmeside

Used skills:

J2EE, Java, JSP, Servlet, XML, HTML, CSS2, JavaScript, HTTP, HTTPS, Eclipse, SSL

SuperUSers
Instructor
1997 - 1999 (3 years)
Karlebo

Task:

The task was to be an instructor for high tech programming cources

Role:

My role in the cources was teaching

Result:

N.A

Used skills:

ADO, RDO, DAO, DOM, SOM, ASP, VB, VC++, C, C++, HTML, DHTML, CSS, XML, JavaScript, VBscript, Visual Interdev, IIS, SQL, MSMQ, MTS, Web, COM

CRI A/S
Developer
1989 - 1997 (9 years)
Birkerød

Task:

Develop military systems

Role:

My role in the project was as a hardware developer

Result:

The hardware boards was developed, assembled and made ready for production for several military projects
Develop a VME-bus compatible military network, consisting of 7 fault tolerant nodes with about 300 P's in a network.
Design and develop of 32 dual SCSI host adapter modules for e minicomputer system and 24 SCSI disk units in 19" racks
Design and production of 8.bits 5*7 alphanumeric display with interface to a PS2 port

Used skills:

VMEbus, SCSI, IBM 360/370 I/O channel, Motorola, 68000, IP

Brüel & Kjær Vibro A/S
Developer
January 1984 - January 1989 (5 years 1 month)
Nærum

Task:

To develop a VME-bus compatible CPU board based on Motorola 6800, 68HC11

Role:

My role in the project was as a hardware developer

Result:

The hardware boards was developed, assembled and made ready for production

Used skills:

VMEbus, VAX, CMS, Concurrent Pascal
